

Allowing Chrome to Run Flash

When attempting to launch a course using Google Chrome and you encounter an issue with an error message or a white screen and you are not able view course content, you need to adjust the Chrome flash settings.

1. With Chrome open type in **chrome://settings/content/flash** in the navigation bar.

2. Slide the button to the right, from “Block sites from running Flash”, to “Ask First (recommended)”. The button will appear blue if it is turned on.

Moxie Media HelpDesk

3. Under the Allow option click ADD, and then type in `[*.]moxielms.com` and click add. You can now navigate to your login page and attempt to relaunch the training.
